

DEMAYNE GOVENDER

Full Stack Software Engineer | Cloud & Business Process Automation

Johannesburg, South Africa | govender.demayne@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with hands-on cloud infrastructure and process-automation experience, delivering full-stack web applications and RESTful APIs across the full software development lifecycle (SDLC). Microsoft Certified: Azure Fundamentals (AZ-900) and Aurachain Academy Advanced Course graduate, designed and built a low-code Business Process Management (BPM) invoice-approval workflow (Aurachain) with role-based routing, a threshold-driven escalation gateway, and an append-only audit trail, alongside four hands-on AWS labs covering VPC architecture and IAM least-privilege design. Proven automation impact: reduced manual payroll processing by 85% and improved RPA uptime from 70% to 99.7%. Ranked in the Top 10 of class (99% average) across both intensive full-stack engineering programmes.

TECHNICAL SKILLS

Cloud & Infrastructure: Microsoft Azure (AZ-900 Certified), AWS (VPC, Subnets, Internet Gateways, Route Tables, Security Groups, Network ACLs, IAM), Docker, CI/CD (Continuous Integration/Continuous Deployment) Pipelines, Git, GitHub, Vercel, Linux/Unix

Low-Code / BPM & Automation: Aurachain (Process Design, Advanced Logic Scripting, Data Store Modeling), Automation Anywhere (Certified), UiPath, Robocorp, Python Scripting, RPA

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3, Bash/Shell

Frontend: React, Next.js, Redux, Tailwind CSS, Bootstrap, Framer Motion, Responsive Design

Backend: Node.js, Express.js, RESTful API Design, Microservices Architecture, JWT Authentication, OAuth 2.0

Databases: MongoDB, MySQL, PostgreSQL, Relational Schema Design, ORM

Testing & Practices: Jest, Cypress, Pytest, TDD, Agile/Scrum, SOLID Principles, SDLC, Code Review, Technical Documentation

PROJECTS

Invoice Approval Workflow | Low-Code BPM Platform (Aurachain)

September 2026

- Designed and built an end-to-end invoice registration and approval process on a low-code BPM platform, implementing **role-based task routing** across three approval tiers, a **threshold-driven escalation gateway** for high-value transactions, and an **append-only audit trail** capturing actor identity, timestamp, and decision on every action.
- Architected a **three-layer validation model** (native field constraints, form-level scripting, and server-side consuming-node guards) and **idempotent duplicate-record checks** to prevent invalid or duplicate invoice entries; diagnosed and resolved multiple platform-level data-binding and gateway-routing defects that had blocked the workflow.
- Maintained a written **architectural decisions log** documenting the reasoning behind each design choice (for example, an append-only audit trail over mutable records, and group-based task reassignment on rework) against the alternatives considered, to support client-facing defensibility of the solution.

AWS Cloud Networking & Security Labs (NextWork)

Present

- Built and documented four hands-on AWS infrastructure projects: designed a **custom VPC (Virtual Private Cloud)** with public and private subnet architecture and IPv4 CIDR planning; configured an **Internet Gateway and route tables** to control internet-bound traffic; and implemented layered network security combining stateful **Security Groups** with stateless **Network ACLs**.
- Applied **least-privilege IAM (Identity and Access Management) policies** using tag-based conditional access to scope a test user to a development environment only; validated enforcement end-to-end by provisioning the IAM user, testing allow/deny behavior against live development and production instances, and using the **IAM Policy Simulator** to confirm policy effect before deployment.

Additional Full-Stack Projects: Credential Management System (React, Node.js, MongoDB, JWT, RBAC, Jest): RBAC (Role-Based Access Control) credential platform with OWASP-aligned auth. Database Project Management System (React, Node.js, MySQL): CLI tool on a normalised relational schema. Professional Portfolio Website (Next.js, Tailwind, Framer Motion): deployed on Vercel with CI/CD.

WORK EXPERIENCE

Technical Operations Analyst (Logistics & Invoicing)

October 2024 to January 2026

Barnes Black Logistics | Johannesburg, South Africa

- Identified and scoped technical automation opportunities across logistics workflows, translating operational pain points into structured engineering requirements and process-improvement initiatives; managed high-volume data workflows for 50+ daily shipments, maintaining a **99.5% on-time delivery rate** and **100% billing accuracy**.
- Produced technical documentation and business process maps for prospective automation systems, applying software engineering methodologies alongside a formal developer role.

Junior Software Developer

August 2023 to December 2023

CIBA Industries | South Africa

- Engineered an automated Timesheet Email Processing System using Python and Automation Anywhere, reducing manual payroll processing by **85%** and cutting processing time from 4+ hours to **under 5 minutes**.
- Developed a Python parsing algorithm with **99.9% accuracy** that eliminated human error and reduced payroll discrepancies by **95%**, validated using Pytest-driven unit test suites.
- Optimised RPA infrastructure end-to-end, increasing system uptime from **70% to 99.7%** and reclaiming **20+ engineering hours** per week for higher-value development work.

EDUCATION & CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) | March 2026

Azure Cloud Concepts · Core Services · Security · Compliance · Pricing

Aurachain Academy Advanced Course | August 2026

Certificate of Completion in low-code BPM process design and development

Robotic Process Automation Professional | November 2023

Automation Anywhere: Enterprise RPA Design, Development & Deployment

Software Engineering, then Full-Stack Web & Software Engineering | June 2023 to November 2025

HyperionDev (Bootcamp) · Ranked Top 10 in Class across both programmes · 99% Average overall
