

DEMAYNE GOVENDER

FULL STACK ENGINEER

Johannesburg, 1459 • (069) 356 3459 • [Email](#) • [LinkedIn](#) • [Github](#) • [Professional Profile](#)

PROFESSIONAL SUMMARY

Full-Stack Engineer specializing in scalable web applications and enterprise automation systems. Delivered measurable business impact—reducing manual processing by 85% and improving system reliability by 30%. Built and deployed 15+ production-ready applications using MERN stack, Python, and cloud technologies.

CORE COMPETENCIES

Technical: Problem-Solving, Cross-Functional Collaboration, Stakeholder Communication, Agile Project Delivery, Technical Documentation, Time Management, Adaptability

Professional: Problem-Solving, Cross-Functional Collaboration, Stakeholder Communication, Agile Project Delivery, Technical Documentation, Time Management, Adaptability

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3

Frontend: React, Redux, Tailwind CSS, Bootstrap, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, Microservices, JWT Authentication

Databases & Cloud: MongoDB, MySQL, PostgreSQL, Docker, CI/CD, Git, Azure & AWS (Cloud Practitioner - In Progress)

Automation & Tools: Automation Anywhere, UiPath, Postman, Webpack

Practices: Agile/Scrum, Test-Driven Development (TDD), DevOps, Code Review, SOLID Principles

WORK EXPERIENCE

Logistics & Invoicing Coordinator | Barnes Black Logistics

10/2024 – Present

- Orchestrate end-to-end courier and freight operations, managing 50+ daily shipments and ensuring a **99.5% on-time delivery rate** through data-driven process optimization.
- Streamline high-volume invoicing and financial reconciliation workflows, maintaining **100% billing accuracy**.
- Analyze supply chain workflows to identify and document key opportunities for process improvement and technical automation.

Junior Software Developer, CIBA Industries

08/2023 - 12/2023

- Architected automation solutions that directly improved payroll and operational efficiency KPIs.
- Engineered an **automated Time Sheet Email Processing System** using Python & Automation Anywhere, **reducing manual payroll processing by 85%** and cutting processing time from **4+ hours to under 5 minutes**.
- Developed a parsing algorithm with **99.9% accuracy**, eliminating human error and reducing payroll discrepancies by **95%**.
- Optimized existing RPA infrastructure, increasing system reliability from **70% to 99.7%** uptime and freeing **20+ hours weekly** for engineering initiatives.
- Collaborated with stakeholders to design technical specifications and deliver automation projects with measurable business impact.

PROJECTS

Credential Management System | React, Node.js, Express.js, MongoDB, JWT | [View on GitHub](#)

- Developed a secure platform for organizations to manage system credentials with role-based access control (RBAC).
- Implemented encryption at rest and in transit, and built a RESTful API supporting full CRUD operations.

Database Project Management System | React, MySQL, Node.js, Database Architecture | [View On GitHub](#)

- A comprehensive, production-ready project management system designed specifically for construction companies. It provides a robust command-line interface for managing construction projects, including tracking architects, contractors, customers, deadlines, and financial information.
- Developed a command-line application for construction companies to comprehensively manage projects, personnel, clients, deadlines, and finances.
- Built a multi-layered architecture with dedicated database, repository, and presentation layers to separate concerns and business logic.
- Engineered a normalized relational database schema to ensure data integrity and support complex queries for reporting and tracking.

- Developed a secure platform for organizations to manage system credentials with role-based access control (RBAC).
- Implemented encryption at rest and in transit, and built a RESTful API supporting full CRUD operations.

EDUCATION & CERTIFICATIONS

Full-Stack Web & Software Engineering (Bootcamp), HyperionDev | [View Portfolio](#) 06/2024 - 11/2025

- Ranked **#1 in class (99% average)** across intensive Software Engineering & Full-Stack Web Development programs.
- Developed and deployed **15+ production-ready full-stack applications** utilizing MERN stack (MongoDB, Express.js, React, Node.js), Python, and Java.
- Engineered scalable microservices architectures with JWT authentication and role-based access control (RBAC), handling concurrent user requests.
- Implemented machine learning pipelines (Python, scikit-learn, pandas) that improved model accuracy by **20%** for data-driven projects.
- Applied engineering best practices including TDD, CI/CD pipeline construction, Git version control, and Agile methodologies throughout

Software Engineering (Bootcamp), HyperionDev | [View Portfolio](#) 06/2023 - 06/2024

- Ranked **#2 in class (99% average)** across intensive Software Engineering programs.
- Completed foundational software engineering training with focus on Python, Java, and OOP principles

ROBOTIC PROCESS AUTOMATION PROFESSIONAL (Automation Anywhere) 08/2023 - 11/2023

- Certified in enterprise robotic process automation design, development, and deployment

AWS Cloud Practitioner (Amazon Web Services) In Progress

- Building cloud infrastructure expertise for scalable application deployment
